Description

Abhydrolase domain-containing protein 2 contains an alpha/beta hydrolase fold, which is a catalytic domain found in a very wide range of enzymes. The function of this protein has not been determined. Alternative splicing of this gene results in two transcript variants encoding the same protein. [provided by RefSeq].

Application Notes

Titration of the ABHD2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 263-292 from the human protein was used as the immunogen for this ABHD2 antibody.

Storage

Aliquot the ABHD2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
