Western blot analysis of ACSM1 antibody and human K562 lysate. Predicted molecular weight ~65 kDa.

ACSM1 antibody intracellular flow cytometric analysis of human K562 cells (right histogram) compared to a [negative control](#) (left histogram). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

Description

Acyl-CoA synthetase medium-chain family member 1 has medium-chain fatty acid:CoA ligase activity with broad substrate specificity (in vitro). This protein acts on acids from C(4) to C(11) and on the corresponding 3-hydroxy-and 2,3-or 3,4-unsaturated acids (in vitro). This protein functions as GTP-dependent lipoate-activating enzyme that generates the substrate for lipoyltransferase

Application Notes

Titration of the ACSM1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 21-48 from the human protein was used as the immunogen for this ACSM1 antibody.

Storage

Aliquot the ACSM1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
