### **Description**

The BANP gene encodes 'BTG3 associated nuclear protein,' a protein that binds to matrix attachment regions. The protein forms a complex with p53 and negatively regulates p53 transcription, and functions as a tumor suppressor and cell cycle regulator. [RefSeq]

## **Application Notes**

Titration of the BANP antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A synthetic peptide from the human protein was used as the immunogen for the BANP antibody.

## **Storage**

Aliquot the BANP antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
