## Description

This gene is a member of the BCL2/adenovirus E1B 19 kd-interacting protein (BNIP) family. It interacts with the E1B 19 kDa protein which is responsible for the protection of virally-induced cell death, as well as E1B 19 kDa-like sequences of BCL2, also an apoptotic protector. Alternative splicing of this gene results in four protein products with identical N- and C-termini.

## Application Notes

Titration of the BNIP1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A portion of amino acids 26-55 from the human protein was used as the immunogen for this BNIP1 antibody.

## **Storage**

Aliquot the BNIP1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
