Description

Chemokine (C-X-C motif) ligand 16 is a small cytokine belonging to the CXC chemokine family. Chemotaxis assays found that CXCL16 induced a strong chemotactic response in activated CD8 T cells.

Application Notes

Differences in protocols and secondary/substrate sensitivity may require the CXCL16 antibody to be titrated for optimal

performance.

Immunogen

Amino acids N30-A196 from the human protein were used as the immunogen for the CXCL16 antibody.

Storage

After reconstitution, the CXCL16 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
