### Description

Dyrk1a may play a role in a signaling pathway regulating nuclear functions of cell proliferation. Phosphorylates serine, threonine and tyrosine residues in its sequence and in exogenous substrates.

### Application Notes

Titration of the Dyrk1a antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 718-745 from the mouse protein was used as the immunogen for this Dyrk1a antibody.

## Storage

Aliquot the Dyrk1a antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
