Western blot analysis of Fascin antibody and Y79 lysate. Predicted molecular weight: 55 kDa.

IHC analysis of FFPE human lung carcinoma with Fascin antibody

Flow cytometric analysis of NCI-H292 cells using Fascin antibody (green) compared to a [negative control](#) (blue). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

Description

Fascin organizes filamentous actin into bundles with a minimum of 4.1:1 actin/fascin ratio. It is probably involved in the assembly of actin filament bundles present in microspikes, membrane ruffles, and stress fibers.

Application Notes

Titration of the Fascin antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 322-350 from the human protein was used as the immunogen for this Fascin antibody.

Storage

Aliquot the Fascin antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
