Description

Fatty acid synthetase catalyzes the formation of long-chain fatty acids from acetyl-CoA, malonyl-CoA and NADPH. This multifunctional protein has 7 catalytic activities and an acyl carrier protein.

Application Notes

The stated application concentrations are suggested starting points. Titration of the Fatty Acid Synthase antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A human recombinant partial protein was used as the immunogen for this Fatty Acid Synthase antibody.

Storage

Store the Fatty Acid Synthase antibody at -20oC.
