<b>Applications</b>	Western Blot : 1:1000
<b>Limitations</b>	This FEZF2 antibody is available for research use only.

## Description

Transcription repressor. Required for the specification of corticospinal motor neurons and other subcerebral projection neurons. May play a role in layer and neuronal subtype-specific patterning of subcortical projections and axonal fasciculation. Controls the development of dendritic arborization and spines of large layer V pyramidal neurons. May be involved in innate immunity (By similarity).

## Application Notes

Titration of the FEZF2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A portion of amino acids 209-237 from the human protein was used as the immunogen for this FEZF2 antibody.

## **Storage**

Aliquot the FEZF2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
