Description

GCN2 (EIF2AK4) belongs to a family of kinases that phosphorylate the alpha subunit of eukaryotic translation initiation factor-2 to downregulate protein synthesis in response to varied cellular stresses.

Application Notes

Titration of the GCN2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 1-30 from the human protein was used as the immunogen for this GCN2 antibody.

Storage

Aliquot the GCN2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
