

Glutamate receptor 3 Antibody (R31619)

Catalog No.	Formulation	Size
R31619	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

[Bulk quote request](#)

Availability	1-3 business days
Species Reactivity	Human, Mouse, Rat
Format	Antigen affinity purified
Host	Rabbit
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Antigen affinity
Buffer	Lyophilized from 1X PBS with 2.5% BSA and 0.025% sodium azide
Gene ID	2892
Applications	Western Blot : 0.5-1ug/ml
Limitations	This Glutamate receptor 3 antibody is available for research use only.

Western blot testing of Glutamate receptor 3 antibody and Lane 1: rat brain; 2: mouse brain lysate. Predicted/observed size ~99KD

Description

Glutamate receptor 3 is a protein that in humans is encoded by the GRIA3 gene. This gene belongs to a family of alpha-amino-3-hydroxy-5-methyl-4-isoxazole propionate (AMPA) receptors. It is mapped to Xq25. Glutamate receptors are the predominant excitatory neurotransmitter receptors in the mammalian brain and are activated in a variety of normal neurophysiologic processes. They are heteromeric protein complexes with multiple subunits, each possessing transmembrane regions, and all arranged to form a ligand-gated ion channel. The classification of glutamate receptors is based on their activation by different pharmacologic agonists.

Application Notes

The stated application concentrations are suggested starting amounts. Titration of the Glutamate receptor 3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

Human partial recombinant protein (AA 29-360) was used as the immunogen for this Glutamate receptor 3 antibody.

Storage

After reconstitution, the Glutamate receptor 3 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
