## Description

Receptor for interleukin-2. This beta subunit is involved in receptor mediated endocytosis and transduces the mitogenic signals of IL2. Probably in association with IL15RA, involved in the stimulation of neutrophil phagocytosis by IL15.

## Application Notes

Optimal dilution of the IL2RB antibody should be determined by the researcher.

## Immunogen

A human recombinant partial protein (amino acids R268-V551) was used as the immunogen for the IL2RB antibody.

## Storage

After reconstitution, the IL2RB antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
