

## Involucrin Antibody (R31905)

Catalog No.	Formulation	Size
R31905	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

**Bulk quote request**

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human
<b>Format</b>	Antigen affinity purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit IgG
<b>Purity</b>	Antigen affinity
<b>Buffer</b>	Lyophilized from 1X PBS with 2.5% BSA and 0.025% sodium azide
<b>UniProt</b>	P07476
<b>Applications</b>	Western Blot : 0.1-0.5ug/ml
<b>Limitations</b>	This Involucrin antibody is available for research use only.

## Description

Involucrin is a protein component of human skin and in humans is encoded by the IVL gene. It is a highly reactive, soluble, transglutaminase substrate protein present in keratinocytes of epidermis and other stratified squamous epithelia. It first appears in the cell cytosol, but ultimately becomes cross-linked to membrane proteins by transglutaminase thus helping in the formation of an insoluble envelope beneath the plasma membrane functioning as a glutamyl donor during assembly of the cornified envelope. Additionally, Involucrin is synthesised in the stratum spinosum and cross linked in the stratum granulosum by the transglutaminase enzyme that makes it highly stable. Thus it provides structural support to the cell, thereby allowing the cell to resist invasion by micro-organisms.

## Application Notes

Optimal dilution of the Involucrin antibody should be determined by the researcher.

## Immunogen

Amino acids QVQDIQPALPTKGEVLLPVEHQQQKQEVQWPPKHK of human Involucrin were used as the immunogen for the Involucrin antibody.

## Storage

After reconstitution, the Involucrin antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
