## Description

Protein orai-2 is a protein that in humans is encoded by the ORAI2 gene. Orai2 transcripts are predominantly expressed in kidney, lung, and spleen, and it appears that Orai2 is the only Orai isoform with multiple transcripts. Co-expression of Orai2 and STIM1 was shown to produce currents that appear similar but smaller than those produced by co-expression of Orai1 and STIM1.

## Application Notes

Optimal dilution of the ORAI2 antibody should be determined by the researcher.

## Immunogen

Recombinant human protein (amino acids H21-L254) was used as the immunogen for the ORAI2 antibody.

## Storage

After reconstitution, the ORAI2 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
