Western blot testing of human lung lysate with RIG antibody at 1:1000. Predicted molecular weight: 12 kDa.

Description

'Protein regulated in glioma' may serve as a molecular marker for or play a role in the malignant progression of glioblastomas.

Application Notes

Titration of the RIG antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 58-87 from the human protein was used as the immunogen for the RIG antibody.

Storage

Aliquot the RIG antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
