Description

Sall4 is a probable transcription factor. Defects in Sall4 are the cause of Okihiro syndrome; also known as Duane radial ray syndrome (DRRS). It is a disorder characterized by the association of forearm malformations with Duane retraction syndrome. Sall4 is also involved in forelimb and heart development in mice.

Application Notes

Titration of the SALL4 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 1009-1039 from the human protein was used as the immunogen for this SALL4 antibody.

Storage

Aliquot the SALL4 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
