Description

Iron-sulfur protein (IP) subunit of succinate dehydrogenase (SDH) that is involved in complex II of the mitochondrial electron transport chain and is responsible for transferring electrons from succinate to ubiquinone (coenzyme Q) (By similarity).

Application Notes

Titration of the Sdhb antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

This Sdhb antibody was produced from a rabbit immunized with a KLH conjugated synthetic peptide between 147-182 amino acids from the zebrafish protein.

Storage

Aliquot the Sdhb antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
