

SOD3 Antibody (F49928)

Catalog No.	Formulation	Size
F49928-0.4ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.4 ml
F49928-0.08ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.08 ml

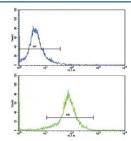

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human
Format	Antigen affinity purified
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit Ig
Purity	Antigen affinity
UniProt	P08294
Localization	Cytoplasm, extracellular matrix
Applications	Western Blot : 1:1000 IHC (Paraffin) : 1:10-1:50 Flow Cytometry : 1:10-1:50
Limitations	This SOD3 antibody is available for research use only.

IHC analysis of FFPE human lung carcinoma stained with SOD3 antibody

Flow cytometric analysis of K562 cells using SOD3 antibody (green) compared to a <u>negative control</u> (blue). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

Description

SOD3 is a member of the superoxide dismutase(SOD) protein family. SODs are antioxidant enzymes that catalyze the dismutation of two superoxide radicals into hydrogen peroxide and oxygen. This protein is thought to protect the brain, lungs, and other tissues from oxidative stress. The protein is secreted into the extracellular space and forms a glycosylated homotetramer that is anchored to the extracellular matrix (ECM) and cell surfaces through an interaction with heparan sulfate proteoglycan and collagen. A fraction of the protein is cleaved near the C-terminus before secretion to generate circulating tetramers that do not interact with the ECM.

Application Notes

Titration of the SOD3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 7-36 from the human protein was used as the immunogen for this SOD3 antibody.

Storage

Aliquot the SOD3 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
