Description

Taste receptor type 2 member 5 is a receptor that may play a role in the perception of bitterness and is gustducin-linked. May play a role in sensing the chemical composition of the gastrointestinal content. The activity of this receptor may stimulate alpha gustducin, mediate PLC-beta-2 activation and lead to the gating of TRPM5.

Application Notes

The stated application concentrations are suggested starting points. Titration of the TAS2R5 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 183-215 from the human protein was used as the immunogen for the TAS2R5 antibody.

Storage

Aliquot the TAS2R5 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
