IHC analysis of FFPE human skeletal muscle stained with TAZ antibody

TAZ antibody flow cytometric analysis of MDA-MB231 cells (green) compared to a [negative control](#) (blue). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

## Description

TAZ is a protein that is expressed at high levels in cardiac and skeletal muscle.

## Application Notes

Titration of the TAZ antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 32-60 from the human protein was used as the immunogen for this TAZ antibody.

## Storage

Aliquot the TAZ antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
