Description

TLE2 is a transcriptional corepressor that binds to a number of transcription factors. Inhibits the transcriptional activation mediated by CTNNB1 and TCF family members in Wnt signaling. The effects of full-length TLE family members may be modulated by association with dominant-negative AES (By similarity).

Application Notes

Titration of the TLE2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 637-665 from the human protein was used as the immunogen for this TLE2 antibody. **Storage** Aliquot the TLE2 antibody and store frozen at -20oC or colder.
