Description

F-actin cross-linking protein which is thought to anchor actin to a variety of intracellular structures. This is a bundling protein. Probably involved in vesicular trafficking via its association with the CART complex. The CART complex is necessary for efficient transferrin receptor recycling but not for EGFR degradation.

Application Notes

Optimal dilution of the ACTN4 antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human Alpha Actinin 4 / ACTN4 was used as the immunogen for the ACTN4 antibody.

Storage

Store the ACTN4 antibody at -20oC.
