## Description

The specific function of this gene has not yet been determined; however, the protein it encodes is known to be a major constituent of the ARP2/3 complex. This complex is located at the cell surface and is essential to cell shape and motility through lamellipodial actin assembly and protrusion. Three transcript variants encoding two different isoforms have been found for this gene.

## Application Notes

Optimal dilution of the ACTR3 antibody should be determined by the researcher.

## Immunogen

Recombinant human protein (amino acids M1-S418) was used as the immunogen for the ACTR3 antibody.

## Storage

After reconstitution, the ACTR3 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
