Description

Angiopoietin-related protein 2, also known as Angiopoietin-like protein 2, is a protein that in humans is encoded by the ANGPTL2 gene. Angiopoietins are members of the vascular endothelial growth factor family and the only known growth factors largely specific for vascular endothelium. Angiopoietin-1, angiopoietin-2, and angiopoietin-4 participate in the formation of blood vessels. ANGPTL2 protein is a secreted glycoprotein with homology to the angiopoietins and may exert a function on endothelial cells through autocrine or paracrine action.

Application Notes

Optimal dilution of the ANGPTL2 antibody should be determined by the researcher.

Immunogen

Amino acids 275-312 (WRDCLQALEDGHDTSSIYLVKPENTNRLMQVWCDQRHD) from the human protein were used as the immunogen for the ANGPTL2 antibody.

Storage

After reconstitution, the ANGPTL2 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
