Anti-FOXP3 antibody western blot analysis in CEM lysate

## Description

Forkhead box P3 is a member of the forkhead/winged-helix family of transcriptional regulators. Defects in this gene are the cause of immunodeficiency polyendocrinopathy, enteropathy, X-linked syndrome (IPEX), also known as X-linked autoimmunity-immunodeficiency syndrome. Alternatively spliced transcript variants encoding different isoforms have been identified.

## Application Notes

Titration of the anti-FOXP3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 397-423 from the human protein was used as the immunogen for this anti-FOXP3 antibody.

## Storage

Aliquot the anti-FOXP3 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.

## Alternate Names

Scurfin
