Anti-Lambda Antibody SPM559 / IGL Antibody [clone SPM559] (V9032)

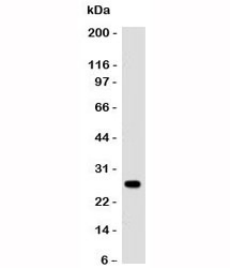

Catalog No.	Formulation	Size
V9032-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	100 ug
V9032-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	20 ug
V9032SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug
V9032IHC-7ML	Prediluted in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide; *For IHC use only*	7 ml

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Host	Mouse
Clonality	Monoclonal (mouse origin)
Isotype	Mouse IgG2a, kappa
Clone Name	SPM559
Purity	Protein G affinity chromatography
UniProt	P01701, P01842
Localization	Cell Surface, Cytoplasmic and Secreted
Applications	Western blot: 1-2ug/ml Immunohistochemistry (FFPE): 1-2ug/ml for 30 min at RT
Limitations	This Anti-Lambda Antibody SPM559 is available for research use only.

Anti-Lambda Antibody SPM559 IHC: Formalin-fixed, paraffin-embedded human tonsil stained with anti-Lambda antibody (clone SPM559).

Anti-Lambda Antibody SPM559 WB. Western blot of human intestinal lysate using anti-Lambda antibody (clone SPM559).

Description

Anti-Lambda Antibody SPM559 is specific to lambda light chain of immunoglobulin and shows no cross-reaction with kappa light chain or any of the five heavy chains. In mammals, the two light chains in an antibody are always identical, with only one type of light chain, kappa or lambda. The ratio of Kappa to Lambda is 70:30. However, with the occurrence of multiple myeloma or other B-cell malignancies this ratio is disturbed. Antibody to the lambda light chain is reportedly useful in the identification of leukemias, plasmacytomas, and certain non-Hodgkin's lymphomas. Demonstration of clonality in lymphoid infiltrates indicates that the infiltrate is malignant.

For a recombinant mouse monoclonal targeting the same immunoglobulin light-chain class, see our Lambda Light Chain Antibody rLLC/1738 / IGL Antibody page.

Application Notes

The optimal dilution of the Anti-Lambda Antibody SPM559 for each application should be determined by the researcher.

1. Staining of formalin-fixed tissues requires boiling tissue sections in pH 9 10mM Tris with 1mM EDTA for 10-20 min followed by cooling at RT for 20 minutes.
2. The prediluted format is supplied in a dropper bottle and is optimized for use in IHC. After epitope retrieval step (if required), drip mAb solution onto the tissue section and incubate at RT for 30 min.

Immunogen

Purified human IgG was used as the immunogen for this Anti-Lambda Antibody SPM559.

Storage

Store the Anti-Lambda Antibody SPM559 at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
