Description

The primary translation product of the APOA4 gene is a 396-residue preprotein which after proteolytic processing is secreted into its primary site of synthesis, the intestine, in association with chylomicron particles. Although its precise function is not known, apo A-IV is a potent activator of lecithin-cholesterol acyltransferase in vitro.

For an alternative Protein Microarray Validated monoclonal clone with additional tissue validation, see our APOA4 Antibody APOA4/3372 / Apolipoprotein A-IV Antibody page.

Application Notes

Titration of the APOA4 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 49-79 from the human protein was used as the immunogen for this APOA4 antibody.

Storage

Aliquot the APOA4 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
