Description

ADP-ribosylation factor 4 is a GTP-binding protein that functions as an allosteric activator of the cholera toxin catalytic subunit, an ADP- ribosyltransferase. Involved in protein trafficking; may modulate vesicle budding and uncoating within the Golgi apparatus.

Application Notes

Titration of the ARF4 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 72-106 from the human protein was used as the immunogen for the ARF4 antibody.

Storage

Aliquot the ARF4 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
