Description

Members of the ARID protein family, including ARID5A, have diverse functions but all appear to play important roles in development, tissue-specific gene expression, and regulation of cell growth.

Application Notes

Optimal dilution of the ARID5A antibody should be determined by the researcher.

Immunogen

Recombinant human protein (amino acids R55-L594) was used at the immunogen for the ARID5A antibody.

Storage

After reconstitution, the ARID5A antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
