## Description

Required for autophagy. Conjugates to ATG12 and associates with isolation membrane to form cup-shaped isolation membrane and autophagosome. The conjugate detaches from the membrane immediately before or after autophagosome formation is completed. May play

## Application Notes

The stated application concentrations are suggested starting points. Titration of the ATG5 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A synthetic protein specific to ATG5 was used as the immunogen for the ATG5 antibody.

## Storage

Store the ATG5 antibody at -20oC.
