

Beta-secretase 1 Antibody / Memapsin-2 / BACE1C (F54840)

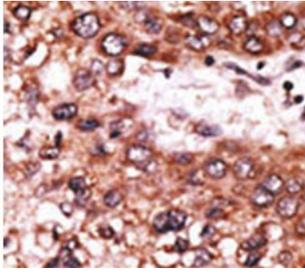

Catalog No.	Formulation	Size
F54840-0.4ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.4 ml
F54840-0.08ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.08 ml

Bulk quote request

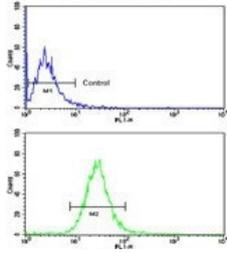

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Host	Rabbit
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit Ig
Purity	Purified
UniProt	P56817
Localization	Cytoplasmic
Applications	Immunohistochemistry (FFPE) : 1:50-1:100 Flow Cytometry : 1:10-1:50 (1x10e6 cells) Western Blot : 1:500-1:1000
Limitations	This Beta-secretase 1 antibody is available for research use only.

Western blot testing of human NCI-H460 cell lysate with Beta-secretase 1 antibody.
Predicted molecular weight ~56 kDa.

IHC testing of FFPE human cancer tissue with Beta-secretase 1 antibody. HIER: steam section in pH6 citrate buffer for 20 min and allow to cool prior to staining.

Flow cytometry testing of human NCI-H460 cells with Beta-secretase 1 antibody; Blue=isotype control, Green= Beta-secretase 1 antibody.

Description

Cerebral deposition of amyloid beta peptide is an early and critical feature of Alzheimer's disease. Amyloid beta peptide is generated by proteolytic cleavage of amyloid precursor protein (APP) by two proteases, one of which is the BACE1. The encoded protein, a member of the peptidase A1 protein family, is a type I integral membrane glycoprotein and aspartic protease that is found mainly in the Golgi.

Application Notes

The stated application concentrations are suggested starting points. Titration of the Beta-secretase 1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 125-154 from the human protein was used as the immunogen for the Beta-secretase 1 antibody.

Storage

Aliquot the Beta-secretase 1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
