Description

Tubulin is the major constituent of microtubules. It binds two moles of GTP, one at an exchangeable site on the beta chain and one at a non-exchangeable site on the alpha chain. Ubiquitously expressed with highest levels in spleen, thymus and immature brain.

Application Notes

Optimal dilution of the Beta Tubulin antibody should be determined by the researcher.

Immunogen

Recombinant full-length human protein was used as the immunogen for the Beta Tubulin antibody.

Storage

Aliquot the Beta Tubulin antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
