Availability	1-3 business days
Species Reactivity	All species
Format	Purified
Host	Rabbit
Clonality	Recombinant Rabbit Monoclonal
Isotype	Rabbit IgG, kappa
Clone Name	BTN/8672R
Purity	Protein A affinity
UniProt	Not Applicable
Applications	Flow Cytometry : 1-2ug/million cells Immunofluorescence : 1-2ug/ml Western Blot : 1-2ug/ml Immunohistochemistry (FFPE) : 1-2ug/ml for 30 minutes at RT
Limitations	This Biotin antibody is available for research use only.

IHC staining of FFPE human kidney tissue with Biotin antibody (clone BTN/8672R).
HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

Description

This mAb recognizes both the free and protein-conjugated (either soluble or cell bound) form of biotin. It is highly specific

to biotin and shows no cross-reaction with other structurally related compounds. It has a very high affinity for biotin and is excellent for use in various amplification techniques. In some applications, localization of biotinylated probes with avidin produces unacceptably high background staining. Anti-biotin antibody may be substituted to decrease this noise.

Application Notes

Optimal dilution of the Biotin antibody should be determined by the researcher.

Immunogen

Biotinylated sheep immunoglobulin was used as the immunogen for the Biotin antibody.

Storage

Aliquot the Biotin antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
