Western blot testing of human Raji cell lysate with BLNK antibody. Predicted molecular weight: ~51 kDa but can be observed at 65-70 kDa.

Description

Functions as a central linker protein, downstream of the B-cell receptor (BCR), bridging the SYK kinase to a multitude of signaling pathways and regulating biological outcomes of B-cell function and development. [UniProt]

Application Notes

Optimal dilution of the BLNK antibody should be determined by the researcher.

Immunogen

A synthetic peptide from human BLNK protein was used as the immunogen for the BLNK antibody.

Storage

Store the BLNK antibody at -20oC.
