

## BPIFA1 Antibody / SPLUNC1 / PLUNC (RQ6758)

Catalog No.	Formulation	Size
RQ6758	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

[Bulk quote request](#)

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human, Mouse
<b>Format</b>	Antigen affinity purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit IgG
<b>Purity</b>	Antigen affinity purified
<b>Buffer</b>	Lyophilized from 1X PBS with 2% Trehalose
<b>UniProt</b>	Q9NP55
<b>Applications</b>	Western Blot : 1-2ug/ml Direct ELISA : 0.1-0.5ug/ml
<b>Limitations</b>	This BPIFA1 antibody is available for research use only.

Western blot testing of mouse NIH 3T3 cell lysate with BPIFA1 antibody. Predicted molecular weight: 25-27 kDa.

### Description

Palate, lung, and nasal epithelium clone protein (PLUNC) is a gene encoding a secretory protein. This gene is the human homolog of murine plunc, and like the mouse gene, is specifically expressed in the upper airways and nasopharyngeal regions. The encoded antimicrobial protein displays antibacterial activity against Gram-negative bacteria. It is thought to be involved in inflammatory responses to irritants in the upper airways and may also serve as a potential molecular marker for detection of micrometastasis in non-small-cell lung cancer. Multiple transcript variants resulting from alternative splicing in the 3' UTR have been detected, but the full-length nature of only three are known.

## Application Notes

Optimal dilution of the BPIFA1 antibody should be determined by the researcher.

## Immunogen

Recombinant human protein (amino acids L64-V256) was used as the immunogen for the BPIFA1 antibody.

## Storage

After reconstitution, the BPIFA1 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
