SDS-PAGE analysis of purified, BSA-free BrdU antibody (clone BRD2888R) as confirmation of integrity and purity.

## Description

This antibody reacts with Bromodeoxyuridine (BrdU) in single stranded DNA (produced by partial denaturation of double stranded DNA), BrdU coupled to a protein carrier, as well as free BrdU. BrdU is a thymidine analog, incorporated into cell nuclei during DNA synthesis prior to mitosis. Antibody to Bromodeoxyuridine / BrdU is helpful in detecting S-phase cells, providing useful information on the aggressiveness of tumors.

## Application Notes

The concentration stated for each application is a general starting point. Variations in protocols, secondaries and substrates may require the Bromodeoxyuridine / BrdU antibody to be titrated up or down for optimal performance.

1. For staining of formalin-fixed tissues, incubate sections in 4N HCl for 30 minutes at RT followed by digestion with trypsin at 1mg/ml PBS, 10 min at 37°C.

## Immunogen

BrdU / Bromodeoxyuridine conjugated to KLH was used as the immunogen for this BrdU antibody.

## Storage

Store the BrdU antibody at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).

## Alternate Names

Bromodeoxyuridine, BUdr, BrdU antibody
