Western blot testing of human SH-SY5Y cell lysate with C12orf53 antibody. Predicted molecular weight ~30 kDa but may be observed at higher molecular weights due to glycosylation.

Description

This gene encodes a ligand for the paired immunoglobulin-like type 2 receptor alpha, and so may be involved in immune regulation. Alternate splicing results in multiple transcript variants encoding different proteins.

Application Notes

Optimal dilution of the C12orf53 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids R56-L282) was used as the immunogen for the C12orf53 antibody.

Storage

After reconstitution, the C12orf53 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
