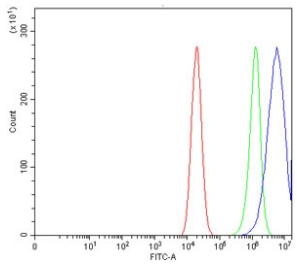
Caspase-9 Antibody / CASP9 (RQ6974)

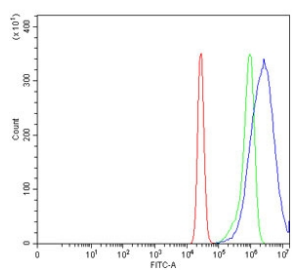
Catalog No.	Formulation	Size
RQ6974	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

Bulk quote request

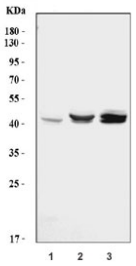
Availability	1-3 business days
Species Reactivity	Human
Format	Antigen affinity purified
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Antigen affinity purified
Buffer	Lyophilized from 1X PBS with 2% Trehalose
UniProt	P55211
Applications	Western Blot : 0.5-1 ug/ml Flow Cytometry : 1-3ug/million cells Direct ELISA : 0.1-0.5ug/ml
Limitations	This Caspase-9 antibody is available for research use only.



Flow cytometry testing of human Caco-2 cells with Caspase-9 antibody at 1ug/million cells (blocked with goat sera); Red=cells alone, Green=isotype control, Blue= Caspase-9 antibody.



Flow cytometry testing of human K562 cells with Caspase-9 antibody at 1ug/million cells (blocked with goat sera); Red=cells alone, Green=isotype control, Blue= Caspase-9 antibody.



Western blot testing of human 1) Jurkat, 2) HeLa and 3) HCCT cell lysate with Caspase-9 antibody. Expected molecular weight: 45-50 kDa.

Description

CASP9 is also known as MCH6 or APAF3. This gene encodes a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic processing at conserved aspartic residues to produce two subunits, large and small, that dimerize to form the active enzyme. This protein can undergo autoproteolytic processing and activation by the apoptosome, a protein complex of cytochrome c and the apoptotic peptidase activating factor 1; this step is thought to be one of the earliest in the caspase activation cascade. This protein is thought to play a central role in apoptosis and to be a tumor suppressor. Alternative splicing results in multiple transcript variants.

Application Notes

Optimal dilution of the Caspase-9 antibody should be determined by the researcher.

Immunogen

Recombinant human protein (amino acids D53-N268) was used as the immunogen for the Caspase-9 antibody.

Storage

After reconstitution, the Caspase-9 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
