

Cathepsin G Antibody / CTSG (R32521)

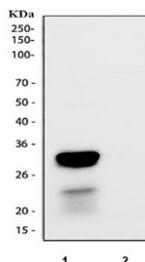

Catalog No.	Formulation	Size
R32521	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

[Bulk quote request](#)

Availability	1-3 business days
Species Reactivity	Human
Format	Antigen affinity purified
Host	Rabbit
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Antigen affinity
Buffer	Lyophilized from 1X PBS with 2% Trehalose
UniProt	P08311
Localization	Cytoplasmic
Applications	Western Blot : 0.5-1ug/ml Immunohistochemistry (FFPE) : 2-5ug/ml
Limitations	This Cathepsin G antibody is available for research use only.

IHC staining of FFPE human tonsil tissue with Cathepsin G antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

Western blot testing of human 1) ThP-1 and 2) MCF7 cell lysate with Cathepsin G antibody at 0.5ug/ml. Predicted molecular weight ~29 kDa, can be observed at ~36 kDa.

Description

Cathepsin G is an enzymatic protein belonging to the peptidase or protease families. In humans, it is coded by the CTSG gene. This gene is mapped to 14q12. In transgenic mice, it was found that human Cathepsin G gene was expressed in early myeloid precursors in a manner coordinate with the expression of the endogenous murine gene in the bone marrow and spleen. The protein encoded by this gene, a member of the peptidase S1 protein family, is found in azurophil granules of neutrophilic polymorphonuclear leukocytes. The encoded protease has a specificity similar to that of chymotrypsin C, and may participate in the killing and digestion of engulfed pathogens, and in connective tissue remodeling at sites of inflammation.

Application Notes

Differences in protocols and secondary/substrate sensitivity may require the Cathepsin G antibody to be titrated for optimal performance.

Immunogen

Amino acids R25-E252 from the human protein were used as the immunogen for the Cathepsin G antibody.

Storage

After reconstitution, the Cathepsin G antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
