

## Cathepsin L Antibody [clone 33/2] (R30013)

Catalog No.	Formulation	Size
R30013	0.5mg/ml with 1% BSA and 0.01% sodium azide if reconstituted with 0.2ml sterile 1X PBS	100 ug

[Bulk quote request](#)

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human, Mouse, Rat
<b>Format</b>	Ascites
<b>Host</b>	Mouse
<b>Clonality</b>	Monoclonal (mouse origin)
<b>Isotype</b>	Mouse IgG1
<b>Clone Name</b>	33/2
<b>Purity</b>	Ascites
<b>Gene ID</b>	1514
<b>Applications</b>	Western Blot : 0.5-1ug/ml Immunohistochemistry (Frozen) : 4ug/ml-formalin/acetone fixed tissues
<b>Limitations</b>	This Cathepsin L antibody is available for research use only.

Western blot testing of human A549 cell lysate with Cathepsin L antibody. Expected molecular weight: 38-41 kDa with multiple smaller processed/active forms.

### Description

Cathepsin L is a lysosomal cysteine proteinase with a major role in intracellular protein catabolism. It also shows the most potent collagenolytic and elastinolytic activity in vitro of any of the cathepsins. Cathepsin L has been implicated in pathologic processes including myofibril necrosis in myopathies and in myocardial ischemia, and in the renal tubular response to proteinuria. Human liver cathepsin L consists of a heavy chain of about 25 kD and a light chain of about 5 kD. The gene is mapped to 9q21-q22. Cathepsin L is required for endothelial progenitor cell-induced neovascularization.

## Application Notes

The stated application concentrations are suggested starting amounts. Titration of the Cathepsin L antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

Procathepsin L isolated from the human lung cancer cell line EPLC 32M1 was used as the immunogen for this Cathepsin L antibody.

## Storage

After reconstitution, the Cathepsin L antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
