CD107A Antibody IIB-12 / LAMP1 Rabbit Monoclonal Antibody [clone IIB-12] (RQ5358)

Catalog No.	Formulation	Size
RQ5358	Antibody in PBS with 0.02% sodium azide, 50% glycerol and 0.4-0.5mg/ml BSA	100 ul

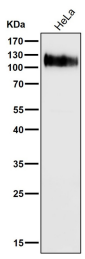

Recombinant RABBIT MONOCLONAL

Bulk quote request

Species Reactivity	Human
Format	Purified
Host	Rabbit
Clonality	Recombinant Rabbit Monoclonal
Isotype	Rabbit IgG
Clone Name	IIB-12
Purity	Affinity purified
UniProt	P11279
Applications	Western blot: 1:500-1:2000
Limitations	This CD107A Antibody IIB-12 / LAMP1 Rabbit Monoclonal Antibody is available for research use only.

Western blot testing of human A431 cell lysate with CD107A Antibody IIB-12. This heavily glycosylated protein of 417 amino acids is visualized at up to 140 kDa.

Western blot testing of human HeLa cell lysate with CD107A antibody. This heavily glycosylated protein of 417 amino acids is visualized at up to 140 kDa.

Description

CD107A Antibody IIB-12 / LAMP1 Rabbit Monoclonal Antibody detects CD107A, the protein encoded by the LAMP1 gene. Its is a member of a family of membrane glycoproteins. This glycoprotein provides selectins with carbohydrate ligands. It may also play a role in tumor cell metastasis.

Visit our LAMP1 Antibody / Lysosomal Membrane Glycoprotein Antibody page to explore additional validated antibodies and research tools for investigating LAMP1 expression, lysosomal membrane biology, intracellular trafficking, autophagy, and immune cell function.

Application Notes

Optimal dilution of the CD107A Antibody IIB-12 / LAMP1 Rabbit Monoclonal Antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human LAMP1 / CD107A was used as the immunogen for the CD107A antibody.

Storage

Store the CD107A antibody at -20oC.

Alternate Names

CD107a antibody, Lysosome-Associated Membrane Protein 1 antibody, Lysosomal Associated Membrane Protein 1 antibody, Lysosomal Membrane Glycoprotein 1 antibody, LGP120 antibody
