

## CD38 Antibody [clone CD38/8994R] (V5016)

Catalog No.	Formulation	Size
V5016-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	100 ug
V5016-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	20 ug
V5016SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug

Recombinant **RABBIT MONOCLONAL**

[Bulk quote request](#)

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human
<b>Format</b>	Purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Recombinant Rabbit Monoclonal
<b>Isotype</b>	Rabbit IgG, kappa
<b>Clone Name</b>	CD38/8994R
<b>Purity</b>	Protein A/G affinity
<b>UniProt</b>	P28907
<b>Localization</b>	Cell Surface, Cytoplasm
<b>Applications</b>	Immunohistochemistry (FFPE) : 1-2ug/million cells
<b>Limitations</b>	This CD38 antibody is available for research use only.

## Description

CD38 is a type II transmembrane glycoprotein that is present on early B- and T-cell lineages and activated B- and T-cells but is absent from most mature resting peripheral lymphocytes. CD38 is found on thymocytes, pre-B cells, germinal

center B-cells, mitogen-activated T-cells, monocytes and Ig-secreting plasma cells. CD38 is expressed on CD34+ cells. The CD34+CD38- population of hematopoietic stem cells define the most pluripotent cells (e.g. blast colony forming cells).

## **Application Notes**

Optimal dilution of the CD38 antibody should be determined by the researcher.

## **Immunogen**

A recombinant partial protein sequence (within amino acids 200-300) from the human protein was used as the immunogen for the CD38 antibody.

## **Storage**

Aliquot the CD38 antibody and store frozen at -20°C or colder. Avoid repeated freeze-thaw cycles.
