Western blot testing of human U-87 MG cell lysate with CDH10 antibody. Predicted molecular weight ~88 kDa but may be observed at higher molecular weights due to glycosylation.

Description

Cadherins are calcium-dependent cell adhesion proteins. They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may thus contribute to the sorting of heterogeneous cell types. [UniProt]

Application Notes

Optimal dilution of the CDH10 antibody should be determined by the researcher.

Immunogen

A synthetic peptide from human Cadherin 10 protein was used as the immunogen for the CDH10 antibody.

Storage

Store the CDH10 antibody at -20oC.
