## Description

CMBL is a cysteine hydrolase of the diene lactone hydrolase family that is highly expressed in liver cytosol. CMBL preferentially cleaves cyclic esters, and it activates medoxomil-ester prodrugs in which the medoxomil moiety is linked to an oxygen atom.

## Application Notes

Optimal dilution of the CMBL antibody should be determined by the researcher.

## Immunogen

Amino acids YIEEARRNLIEWLNKYV from the mouse protein were used as the immunogen for the CMBL antibody.

## Storage

After reconstitution, the CMBL antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
