Colipase Antibody / CLPS [clone CLPS/9900] (V5667)

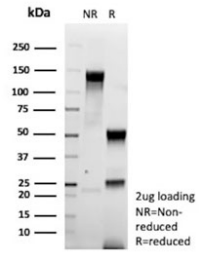

Catalog No.	Formulation	Size
V5667-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	100 ug
V5667-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	20 ug
V5667SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Host	Mouse
Clonality	Monoclonal (mouse origin)
Isotype	Mouse IgG1, kappa
Clone Name	CLPS/9900
Purity	Protein G affinity
UniProt	P04118
Localization	Secreted
Applications	Immunohistochemistry (FFPE): 1-2ug/ml
Limitations	This Colipase antibody is available for research use only.

IHC staining of FFPE human pancreas tissue with Colipase antibody (clone CLPS/9900). Inset: PBS used in place of primary Ab (secondary Ab negative control). HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

SDS-PAGE analysis of purified, BSA-free Colipase antibody (clone CLPS/9900) as confirmation of integrity and purity.

Description

CLPS, also known as Colipase, is a secreted pancreatic protein that supports lipid metabolism through its interaction with pancreatic lipase. The Colipase Antibody / Pancreatic Exocrine Secretion Marker enables detection of this protein in exocrine pancreatic systems.The lipase gene family belongs to one of the most robust genetic superfamilies found in living organisms, which includes esterases and thioesterases. Members of the AB hydrolase subfamily include Hepatic Lipase (HL), Endothelial Lipase (EL), Lipoprotein Lipase (LPL), Pancreatic Lipase (PL), Gastric Lipase (GL) and LCAT. These family members play a crucial role in the metabolism of lipids. Pancreatic lipase, also designated pancreatic triacylglycerol acyl hydrolase, is important for dietary fat absorption as it hydrolyses triglycerides into diglycerides, monoglycerides and free fatty acids. Colipase, also known as CLPS or pancreatic colipase preproprotein, is a 112 amino acid secreted protein that functions as a cofactor of pancreatic lipase. Necessary for dietary lipid hydrolysis and localizing to pancreatic acinar cells, colipase allows pancreatic lipase to anchor itself to the lipid-water interface of lipid micelles, thereby preventing intestinal bile salts from washing it off.

This antibody complements a related Colipase antibody targeting pancreatic enzyme activity.

Application Notes

Optimal dilution of the Colipase antibody should be determined by the researcher.

Immunogen

A portion of amino acids 1-112 from human CLPS protein was used as the immunogen for the Colipase antibody.

Storage

Aliquot the Colipase antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
