

# Cyclin B2 Antibody / CCNB2 [clone X29.2] (V8196)

Catalog No.	Formulation	Size
V8196-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	100 ug
V8196-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	20 ug
V8196SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug

## **Bulk quote request**

Availability	1-3 business days
Species Reactivity	Human, Mouse, Rat
Format	Purified
Clonality	Monoclonal (mouse origin)
Isotype	Mouse IgG1, kappa
Clone Name	X29.2
Purity	Protein G affinity chromatography
UniProt	O95067
Applications	ELISA (order BSA-free Format For Coating) :
Limitations	This Cyclin B2 antibody is available for research use only.

SDS-PAGE analysis of purified, BSA-free Cyclin B2 antibody (clone X29.2) as confirmation of integrity and purity.

## **Description**

In eukaryotic cells, mitosis is initiated following the activation of a protein kinase known variously as maturation-promoting factor, M phase specific histone kinase or M-phase kinase. This protein kinase is composed of a catalytic subunit (Cdc2), a regulatory subunit (cyclin B) and a low molecular weight subunit (p13-Suc1). The Cdc/cyclin enzyme is subject to

multiple levels of control, of which the regulation of the catalytic subunit by tyrosine phosphorylation is the best understood. Tyrosine phosphorylation inhibits the Cdc2/ cyclin B enzyme, and tyrosine dephosphorylation, occurring at the onset of mitosis, directly activates the pre-MPF complex. Evidence has established that B type cyclins not only act on M phase regulatory subunits of the Cdc2 protein kinase, but also activate the Cdc25A and Cdc25B endogenous tyrosine phosphatase, of which Cdc2 is the physiological substrate. The two B type cyclins, cyclin B1 and cyclin B2, have been shown to have distinct tissue distributions.

## **Application Notes**

Optimal dilution of the Cyclin B2 antibody should be determined by the researcher.

#### **Immunogen**

Recombinant full-length Xenopus laevis Cyclin B2 protein was used as the immunogen for this Cyclin B2 antibody.

#### **Storage**

Store the Cyclin B2 antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
