Description

Cytokeratin 6 Antibody GAO-11 / CK6 Rabbit Monoclonal Antibody detects Keratin 6, an epidermis-specific type I keratin involved in wound healing. Involved in the activation of follicular keratinocytes after wounding, while it does not play a major role in keratinocyte proliferation or migration. Participates in the regulation of epithelial migration by inhibiting the activity of SRC during wound repair.

Application Notes

Optimal dilution of the Cytokeratin 6 Antibody GAO-11 / CK6 Rabbit Monoclonal Antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human Cytokeratin 6 / KRT6A was used as the immunogen for the Cytokeratin 6 antibody.

Storage

Store the Cytokeratin 6 antibody at -20oC.
