| Availability | 1-3 business days |
| Species Reactivity | Human |
| Format | Antigen affinity purified |
| Host | Rabbit |
| Clonality | Polyclonal (rabbit origin) |
| Isotype | Rabbit Ig |
| Purity | Antigen affinity |
| UniProt | O94907 |
| Applications | Western Blot : 1:1000 |
| Limitations | This DKK-1 antibody is available for research use only. |

Description

DKK-1 is a protein that is a member of the dickkopf family. It is a secreted protein with two cysteine rich regions and is involved in embryonic development through its inhibition of the WNT signaling pathway. Elevated levels of DKK-1 in bone marrow plasma and peripheral blood is associated with the presence of osteolytic bone lesions in patients with multiple myeloma.

Application Notes

Titration of the DKK-1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 58-84 from the human protein was used as the immunogen for this DKK-1 antibody.

Storage

Aliquot the DKK-1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
