

## DR6 Antibody (Death Receptor 6) (F45509)

| Catalog No.   | Formulation                                | Size    |
|---------------|--|---------|
| F45509-0.4ML  | In 1X PBS, pH 7.4, with 0.09% sodium azide | 0.4 ml  |
| F45509-0.08ML | In 1X PBS, pH 7.4, with 0.09% sodium azide | 0.08 ml |

|                             |   |
|-----------------------------|---|
| <b>Availability</b>         | 1-3 business days                                     |
| <b>Species Reactivity</b>   | Human   |
| <b>Predicted Reactivity</b> | Mouse, Rat  |
| <b>Format</b>               | Antigen affinity purified                             |
| <b>Host</b>                 | Rabbit  |
| <b>Clonality</b>            | Polyclonal (rabbit origin)                            |
| <b>Isotype</b>              | Rabbit Ig   |
| <b>Purity</b>               | Antigen affinity                                      |
| <b>UniProt</b>              | O75509  |
| <b>Applications</b>         | Western Blot : 1:1000                                 |
| <b>Limitations</b>          | This DR6 antibody is available for research use only. |

### Description

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor has been shown to activate NF-kappaB and MAPK8/JNK, and induce cell apoptosis. Through its death domain, this receptor interacts with TRADD protein, which is known to serve as an adaptor that mediates signal transduction of TNF-receptors. Knockout studies in mice suggested that this gene plays a role in T-helper cell activation, and may be involved in inflammation and immune regulation.

## **Application Notes**

Titration of the DR6 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A portion of amino acids 356-385 from the human protein was used as the immunogen for this DR6 antibody.

## **Storage**

Aliquot the DR6 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
