Immunoprecipitation of HCT116 (+ control) and HeLa (- control) cell lysate using EpCAM antibody.

## Description

May act as a physical homophilic interaction molecule between intestinal epithelial cells (IECs) and intraepithelial lymphocytes (IELs) at the mucosal epithelium for providing immunological barrier as a first line of defense against mucosal infection. Plays a role in embryonic stem cells proliferation and differentiation.

## Application Notes

The stated application concentrations are suggested starting points. Titration of the EpCAM antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A recombinant partial protein was used as the immunogen for this EpCAM antibody.

## Storage

Store the EpCAM antibody at -20oC.
